Vol. 6 No. 10 /

Coleman, Alberta, Thursday, Oct. 28, 1926

Price Per Copy, Five Cents

Local and General Briefs.

The town council of Okotoks will have special constables engaged for Hallowe'en night with instructions to take the names or arrest any grown up youths found damaging property. Innocent fun-seekers will not be interfered with.

"Wear a Poppy on Armistice Day."

Mr. Jack Graham, of the postal service Edmonton, arrived in town on Monday's passenger, and will spend a short vacation with his parents, Mr. and Mrs. F. G. Graham.

Mrs. Luke Lindoe, Park Terrace, entertained a number of friends at dinner on Sunday evening last.

Hon. Alex. Ross, being a good Scotch Presbyterian, might find a place in the King cabinet if he cannot hold his job at Edmonton.

Mr. Wm. Jewett, a well known and popular employee of the International Coal & Coke Co., is leaving Coleman on Friday for Windsor, N.S. Mr. Jewett will go to Edmonton on his way East where he will be joined by Mrs. Jewett, who has been spending a few weeks in the Capital City convalescing from her recent illness. The best wishes of many friends go with them to their new home.

Four local basketball teams have recently been formed and are using the big dancing floor in the Arena on which to practice and play their scheduled games.

Mr. H. B. Cowley, representing the Vancouver Investment Co., is spending a few days in town this week offering North Vancouver property to local buyers. Quite a number of Coleman people have purchased lots. The price appears reasonable considering the location of the property.

Messrs. G. R. Powell, H. C. McBurney, H. Antel, and R. G. Powell were among the nimble seeking chicken and ducks on the creek over the week-end and the early part of this week. They report fair success with birds not any too plentiful.

Bills are out announcing a dance in the Italian hall on Monday evening, Nov. 1st.

Make your selection of private greeting cards early. Now is the time to order for overseas mailing. The Journal line is beautiful but not expensive. Phone 209 and a representative will call with samples.

The L. O. B. A. are holding a Pantry Sale and Hallowe'en Tea in the K. P. hall on Saturday, Oct. 30th, from 2 to 6 p.m.

The roadway going up the hill on Central Avenue has been improved by the erection of a fence.

Mr. Fred Cox arrived in town on Thursday morning from Edmonton. Mrs. Cox is expected here from Parkburg on Sunday, and Mr. and Mrs. Cox may spend the winter in Coleman.

Another electric light standard was erected by the council on Main street early this week.

The Ladies Aid of St. Paul's United Church are preparing for a Sale of Work to be held on the afternoon of November twenty-seventh. Details will be announced later.

Fortune Teller—You will be married three times. Movie Actress—I want a future, not the past.

Price levels usually stay up pretty close to the pocketbook.

Popular Bellevue Artist To Stage Armistice Novelty Show, Nov. 8

Miss Enid Cole, Bellevue's well known dramatic artist, has completed arrangements to stage in the Bellevue theatre, Monday, Nov. 8, what will, no doubt, prove to be one of the most entertaining and enjoyable variety shows ever given in The Pass.

Miss Cole has been working on the program, consisting of five scenes, embracing songs, readings, dances, and patriotic tableaux, during the past six weeks, and rehearsals have been held weekly, with the result that everything is now in readiness for Thanksgiving-Armistice night, Monday, Nov. 8th.

Splendid costumes, costing several hundred dollars, have been procured for those taking character parts in the various scenes, while very fine stage lighting effects have also been purchased and will be installed for the occasion. About forty of Miss Cole's pupils will assist her in staging some of the tableaux. In one particularly appropriate and pretty setting, these young artists will represent Poppies in "Flanders Field." The entire program has been arranged with the two-fold purpose of commemorating Armistice Day and giving enjoyment to all those who appreciate high class dramatic art.

The Serenaders Orchestra of Bellevue have charge of the musical part of the program, and those who have heard this talented musical organization, know that they always measure up to and beyond expectations.

Scale Crow's Nest Mountain —Have Strenuous Climb.

Messrs. Alexander and Smart of the Dominion Forestry branch at Pincher Creek and Calgary respectively, made the ascent of Crow's Nest Mountain last Thursday for the purpose of ascertaining if it was feasible to establish a "look-out" station on top of the bald dome of the Crow.

Upon returning they reported having had a rather strenuous climb, encountering much snow and ice on the higher levels, besides having to negotiate a number of difficult and dangerous ledges in reaching the top of the mountain at an altitude of about 10,000 feet.

Both of the gentlemen are of the opinion that it is not practical to establish a forest fire control look-out on the Crow, owing to the arduous and dangerous climb to reach the summit.

Carbon Monoxide Asphyxiation Caused Death of Hillcrest Men

The coroner's inquest, which has been investigating the cause of the death of the two men, Messrs. Fred Jones and Frank Lote, in the Hillcrest mine explosion on Sept. 19th, finally arrived at a verdict on Saturday of last week.

The inquest was in charge of Coroner A. M. Morrison of Coleman. P. M. Christophers, M. L. A., Blairmore, represented the miners union. Testimony was submitted by Moses Johnson, district mines inspector, Ed Royle, district mines rescue supt., and Fred Willetts, fire boss.

Dr. Rice, who is making an expert investigation into conditions at Hillcrest for the provincial government, spoke informally at the request of John T. Stirling, chief inspector of mines for Alberta. The doctor, head of the U. S. bureau of mines, emphasized the danger of dust explosion and outlined some methods of combatting this menace.

The jury comprised Messrs. Geo. Cruickshanks, H. Orr, Wm. Oakes, H. Kaye, Dan Howcroft, and Andrew Petrie. The verdict brought in was as follows:

"We, the jury, find that Fred Jones came to his death in the Hillcrest mine about 10.30 p.m. on Sept. 19th, 1926, through carbon monoxide asphyxiation, caused by an explosion in the mine. If the other body found was that of Frank Lote, we find that he came to his death through fracture of the skull and chest, caused by the same explosion. We recommend that in future Clause B, Sec. 111, of the Mines Act of Alberta, be strictly adhered to, and that some means be adopted to prevent the danger from dust in the mines of this district."

Thanksgiving Day Monday, Nov. 8th

Thanksgiving and Armistice Day will be observed on Monday, Nov. 8th. The recent statute fixes this joint celebration on the Monday of the week in which November 11th occurs. But a special observance has been requested for the actual day of Armistice. Hon. James A. Robb, acting premier, stated to day that in accordance with the arrangements for Armistice Day made by His Majesty the King, the people of Canada are invited to mark the occasion by two minutes of silence at 11 o'clock, Thursday morning, November 11th. This is a special observance suggested by His Majesty and is in addition to the regular holiday recognized by the parliament of Canada for the Monday previous.

How the Word "News" Came to be Adopted

The word "news" which is so important in our present day existence, has a curious history. Before the advent of newspaper events of general interest were posted in public places under four columns, headed: N. E. W. S.

In the column headed "N" happenings from the North were recorded; in column "E," from the East; in the "W" column were recounted occurrences in the West, and under "S" came Southern notes.

Gradually, these four letters were joined to form the word "News" as we now know it—embodying in itself reports from all points of the compass.

R.F. Barnes Wins McGillivray Cup Men's Singles Competition of Coleman Tennis Club

Early this week saw the finals played between Luke Lindoe and R. F. Barnes for possession of the McGillivray cup, emblematic of the men's singles championship of the local tennis club. Mr. Barnes was the victor.

Eighteen players took part in the competition, and many matches produced some very fine tennis.

United Church Notes

Plans are being made by the ministers at this end of The Pass for an occasional exchange of pulpits during the winter. In this connection Rev. Mr. Oliver, of Bellevue, will be in charge of the service and preach on Sunday evening. This will be a special occasion and all the seats should be occupied. Mr. Bevan will be at Bellevue.

The Trail Rangers to the number of sixteen were at Blairmore on Saturday afternoon to attend a conference meeting under the leadership of K. Bray Powell, Boys' Work Secretary for the Province. Old and new songs were sung and the Trail Ranger program discussed and explained. The conference proper was followed by a period of outdoor group games lead by Mr. Powell. The final event was a treat of ice cream provided by the Blairmore group.

The boys are planning to take care of the actual climbing needed for the mountain climbing badge by climbing to the top of Turtle before winter. So far this month they have hiked on organized hikes more than forty miles. The walk to Blairmore was made by all last Saturday in an hour or less. This was one of the badge tests.

The junior choir, consisting of members of the C. G. I. T. groups filled the pulpit platform on Sunday morning. In addition to leading the praise the girls sang a selection after the offering. Mr. Lees has charge of the girls. The senior choir led in the evening and as always added much to the service. Both choirs meet for practice on Tuesday evenings.

Pointed Paragraphs

The Lord never made Coleman, man did; and it's man's business to keep it going.

Good roads are the product of good heads, broad minds and liberal pocket books.

At that, a man had better spend his last dollar to advertise his business than to advertise his sheriff's sale. There is at least more hope involved.

It takes a lot of gas to produce oil. It takes a lot of talk to produce business. Talking to the community through newspaper advertising is multiplying one's voice a thousand fold. Results come from the duplication of effort.

An alley is no cleaner than its weakest odor.

Many a fortune started through courteous treatment over the counter.

We suggest that they match the question of who started the World War with that of who won it, and call it a draw.

Men are all brothers under the skin, and women are all sisters under the rouge.

Man: A hide full of habits.

NATIONAL POPPY DAY CAMPAIGN ARMISTICE DAY

The Canadian Legion of Alberta have undertaken to dispose of one hundred thousand poppies on Armistice Day, November 11th. The objects of the campaign are fourfold. Primarily, it is to honor our fallen soldiers and show that we, as citizens, do not forget. This tribute is paid on this day in all nations of the Allies.

Secondly, the greater display of poppies means increased employment to our disabled soldiers in Alberta, who make up these poppies. All poppies sold in Alberta by the Legion have been made in Alberta.

Thirdly, whatever organization acts for the Legion, can raise a fund which can only be used for local relief or charitable purposes.

Fourthly, a small profit is made by the Legion which helps in a small measure, to reduce the Legion's expense in handling the hundreds of adjustment cases of deserving disabled, widows or dependents.

SUNSHINE AND SMILES

Getting the Cash

"My father can write about ten lines of poetry and get \$5," said the first boy with a superior air.

"That's nothing," said the second. "My father can draw a few lines, put some notes of music on, and get \$15."

"Well, you'll both have to go way back and sit down," said the third. "My dad's a preacher and he can say about a dozen words and it takes four men to carry the money down the aisles."

An Irish farm hand newly arrived in the province hired out to a hardy tiller of the soil who doesn't spend all his time talking group organization. The harvest season was on and the first morning the family was up and at it before daylight. After breakfast the farmer informed the lad they would cut oats and they made their way through the semi-darkness to the field. Turning to his employer the lad asked what kind of oats they were going to cut, wild oats or tame oats? The ignorance of the new hand riled the farmer and he snapped, "Why you simp, they're tame oats. What makes you ask?"

"Oh, I just wondered the lad," I was sure. I was just wondering on them in the dark like this."

The teacher was endeavoring to make clear to the youngsters the grammatical tenses: "My father had money," she pointed out, "is in the past tense. Now Grace, what tense would you be employing if you say, 'My father has money?'" "That would be pretense," said Grace, very soberly.

No complaint can be made of the purchasing power of a dollar down.

Here and There

The recently organized egg and poultry pool in Saskatchewan has 17,000 members. Egg production in that province is 33,672,263 dozen yearly. Saskatchewan is now the second largest poultry producing province in Canada, Ontario being first.

St. Catharines—The North American celery championship has been awarded to James Little of this city by the American Vegetable Growers' Association, convening in Cleveland. The high quality of Canadian celery has long been recognized and this new triumph is expected to further stimulate production.

The Australian Cricket Team, heroes of five test matches against England this summer, arrived in Canada on the Canadian Pacific liner Montrose, October 28th. After visiting some of the principal cities in Canada and the United States, the team proceeded to Vancouver where they sailed on M.S. Aorangi for their homes in Australia, October 31st.

For the third year in succession the McAdam First Aid Team from New Brunswick carried off the "Grand Challenge Trophy," emblematic of the eastern lines first aid championship of the Canadian Pacific Railway. The competition was held recently at the Place Viger Hotel in Montreal, four other teams from points east of Fort William competing.

The oldest employee of the Canadian Pacific Railway in point of service, Isaac Gougeon, Ogden, vice-president in charge of finance, celebrated his 82nd birthday October 26th. He has served the Company for 44 years and his business experience goes back to the Civil War days. Mr. Ogden was the recipient of felicitations from all parts of the Dominion.

General Booth, head of the Salvation Army, sailed recently from Vancouver on the Canadian Pacific liner Empress of Canada for Japan. The General will tour Japan, China and Korea. True to his maxim of not touching food for two days previous to a sea voyage, the General contented himself with sipping a little hot water while attending to his correspondence and waiting for the liner to sail.

Toronto—The New York Times is about to invest \$500,000 in northern Ontario for the production of all of its newsprint—about 550 tons a day. The announcement of this project was made by the secretary of the president, Adolf Ochs, during the solemn of both in this city. The site selected for the paper plant is at Kapuskasing where there is already a small sulphate mill in operation. The water power, 75,000 h.p., will be generated from Smoky Falls.

Thirty students from Oxford and Wye Agricultural College, Kent, England, returned home on the Canadian Pacific liner Montrose, recently after having assisted in the harvesting of the Saskatchewan crop. These young men were brought out to the Dominion by the Department of Colonization and Development of the Canadian Pacific Railway, and placed on selected Saskatchewan farms by the Women's British Immigration League. The students are resuming their studies in England this fall.

NEW GIRDLE PUT AROUND WORLD BY BEAM SYSTEM

Montreal. — "It is a new girdle put around the world for closer understanding between all men of goodwill," in these words Lord Burnham, chairman of the Imperial Beam Union, greeted the inauguration today of the fastest wireless service in the world, the beam system between Montreal and London. Messages were exchanged at a rate of 200 words a minute and reception here was perfect. The inauguration messages were exchanged between representative journalists of the two British metropolises.

"In the course of years it seems the Atlantic will be entirely abolished and we shall be asking if the work of Columbus was really necessary," wireless the editor of the London Daily Telegraph, while other London newspapers sent greetings in similar vein in reply to those from this side.

The first message was from Lord Atholstan, Montreal, to Lord Burnham congratulating the latter in the completion of "this new link of Empire," and paying tribute to the invention of Signor Marconi and the engineers who had made the latest accomplishment possible. Lord Atholstan referred to the efforts Burnham had made to increase the efficiency of inter-continental communication within the Empire.

Lord Burnham's reply read in part: "It is the opening of a new era in the rapid transmission of news and the instantaneous communication of ideas. Its direct influence upon journalism and politics will be incalculable."

This reply also contained an official message from the Journalists of London to which an immediate response was made as follows:

"Journalists of Montreal, representing those who are working to unite in strongest bonds of empire fealty both British Canadian and English both speaking English of Canada, send heartfelt greetings to British journalists whom they feel are now within a woman's reach of the Canadian metropolis."

Swept By Hurricane

Thirty Dead and Three Hundred Injured in City of Havana, Cuba. — Thirty persons were killed and 200 injured in the city of Havana by the hurricane that swept over the city and other sections of Cuba, according to an official announcement.

All the lower parts of the city were inundated, causing thousands of persons to need temporary aid and shelter. Police and soldiers were patrolling the streets of the city to prevent possible attempts at looting.

President Machado ordered all places of business, schools and instructed the police and military to shoot without warning any persons discovered attempting to carry out depredations.

A house in the Calle Fernandina collapsed during the storm, killing five persons and injuring thirty. Another house on the Malcon was inundated and fell. Thus for the authorities have been unable to explore the ruins.

Many homes in the suburbs are reported to have been wrecked or seriously damaged. From the mouth of the harbor to the monument erected in memory of the officers and men who were killed in the battle of the United States battleship Maine in 1898, the water at times several meters deep along the Malcon. The Maine monument was destroyed except for the base.

Western Writer Receives Recognition. — Miss Irene Moore, of the Morning Leader staff, has been successful in winning a prize of \$500 for an essay on La Verandee in a literary contest conducted by the Bureau of Archives of the Province of Quebec.

Twelve subjects were treated, but only seven prizes awarded. Miss Moore is the only westerner to share in the awards. Other prize-winners were: D. Leland, Montreal; Miss Dorothy Heneker, Montreal; Dr. A. Vailley, Quebec; C. B. Bue, Ottawa; S. Martin, Ottawa; and J. N. Fautoux, Montreal.

Would Boost Duty on Potatoes. — An increase in the duty on potatoes entering Canada from 35 cents per cwt. to 50 cents is asked by the Canadian Horticultural Council in a memorandum submitted to the tariff advisory board recently. The tariff on potatoes entering the United States is 50 cents per cwt. and the Canadian horticulturists want the Canadian duty made the same.

There are about 152,000,000 cotton spinners in the world.

W. N. U. 1928

The Imperial Conference

Premier Ferguson of Ontario Would Have Voters Consider Manifesto in Deliberate Way

STANLEY BALDWIN
Premier of the United Kingdom, who extended a welcome to the imperial conference delegates in London.

Named President Of Canadian Organization

S. B. Gundy Elected Head of Dominion Board of Trade

Saint John, N.B. — S. B. Gundy, a past president of the Toronto Board of Trade, and credited with being one of the principal agents in calling together the Winnipeg economic conference, has been named as the president of the Dominion Board of Trade, which was chosen this morning to be the first president of the Dominion organization. In proposing his name, A. O. Dawson, post president of the Montreal Board of Trade, said that Gundy is a man of wide knowledge and high ability.

Mr. Gundy, in accepting office, predicted the formation of the Canadian Board of Trade would open up new avenues of cooperation between the different boards throughout the Dominion.

Other officers elected, were: Vice-presidents, A. O. Dawson, Montreal; Capt. I. Bulmer, Vancouver; J. H. Paul, Montreal; R. G. Parry, Winnipeg; L. W. Shum, Saint John, chairman of the executive; William Birks, Montreal.

Liner Constructed To Prevent Seasickness

New Greyhound Fitted With Rolling and Balancing Tanks

Hamburg. — Seasickness will be unknown aboard the new Hamburg-America liner New York, according to experts who have examined this huge trans-Atlantic steamer which Mrs. J. W. Walker, wife of New York city's mayor, christened. It is claimed that the construction of this 21,000-ton vessel, together with a system of rolling and balancing tanks will completely eliminate need for fear of the much dreaded ocean malady.

The New York is equipped with two turbines which will provide 15,000 horsepower and assure an average speed of 16 knots an hour. Wireless telegraph mechanism will make possible long distance sea conversations with New York as the boat leaves Hamburg. The vessel is scheduled to make its first western trip about June, 1927.

Dry Forces Active

Will Oppose Candidates Who Support Ontario Liquor Policy

Toronto. — "We are not anticipating the necessity of entering 'dry' candidates in any riding, but we will have to be guided entirely by local conditions as they become apparent," stated W. W. Peck, general secretary of the Ontario Prohibition Union, when asked whether the union would be putting candidates into the field at the coming provincial general elections.

Mr. Peck said that there would be a meeting at which committee would be set up energetically to oppose any candidate who supported the liquor policy of the Conservative Government.

Radio Beam Transmission. — London. — Radio beam transmissions are to be started this week between Bodmin, Cornwall and Montreal, according to The Daily Express.

The newspaper asserts that a prolonged severe test has been successful and the Government has granted a provisional license for a regular service. Messages will be despatched in both directions during 16 hours out of 24.

Advertising Plan Dropped. — London. — It is understood the government intends dropping the postmark advertising scheme which has caused strong opposition from the large advertisers throughout the country, or limiting the advertising in such a way as to "buy British goods."

A Serious Question

Premier Ferguson of Ontario Would Have Voters Consider Manifesto in Deliberate Way

Toronto. — Premier Ferguson will be content with any verdict the electors of Ontario may pronounce at the polls, December 1, if in the meantime they will consider the proposals of the Ontario Government's election manifesto in a quiet, deliberate way, dealing with the matter as a question and not as a theory, the Premier said in an interview here.

"I have nothing to say about the comment made by a number of people, because apparently they have not criticized in any respect the grounds I've given for the public the general conditions as I see them, and am asking for a careful discussion and consideration of the problem. It does not serve any good purpose simply to declaim and shout 'Ferguson is tied up with the veto.' What Ferguson desires of the general public is to consider this question, which touches so closely the moral welfare of all mankind and womanhood of this province."

No U.S. Minister To Canada

President Coolidge Can See No Present Need for One

Washington. — President Coolidge can see no present reason for sending an American minister to Ottawa when Canada sends a resident minister to Washington.

In any event, Mr. Coolidge is quite certain such action would require an act of Congress.

At present, it was said, he feels content with the present organization. Reports that the United States would appoint a minister to Ottawa followed the announcement that Hon. Vincent Massey of Toronto, would be sent to Washington as Canada's first resident minister.

EMPIRE DEFENCE MATTER DEBATED AT CONFERENCE

London. — Despite the existence of strong peace treaties, the question of imperial defence is likely to provoke animated discussion at the Imperial conference. Premier Baldwin's speech at the formal opening stressed the manner in which New Zealand and Singapore were adopting the idea of sharing in the maintenance of naval bases and hinted at the possibility of an arrangement with the Irish Free State in the matter of coast defence.

It is understood General Hore, Premier of South Africa, is a strong opponent to any idea of a contribution for naval defence as was the late Sir Wilfrid Laurier when he was Prime Minister of Canada. It is likely Premier King will proceed cautiously in this matter.

Mr. Baldwin's references to the work of other parts of the Empire in naval contributions is interpreted as a hint to Canada.

Canada's relation to Great Britain on vital lines also will be related to a vital issue, it is thought, by the speech of Rt. Hon. Sir Austen Chamberlain, British Foreign Minister of Foreign Affairs.

Deep interest is being manifested in the possible disclosures of Sir Austen on the inner impact of the recent meeting between himself and Premier Mussolini of Italy and its effect on the Locarno policy.

Famous Horses for Canada

The best of Irish and Scotch hunters are being continually bought up by Canadian buyers. The horse at the extreme right is the famous "Grand Fashion," a class prize winner in most of the principal shows in England and Scotland.

Resigns From Cabinet

HON. A. P. MCNAB

HON. A. P. MCNAB
Who has retired from the post of minister of public works in the Saskatchewan government to take a seat on the local government board.

Trade In Favor Of Canada

Exports to South Africa Much Greater Than Imports

Ottawa. — The announcement of Premier King in London of steps to negotiate a trade treaty with South Africa, while quite in keeping with the export trade plan of the Government, raises some questions here as to just what concessions will be asked and given. It is presumed that Canada may ask pretty much what it has been granted by Australia. South Africa already enjoys, automatically, the preferences extended under the Australian, New Zealand and West Indian treaties, although her products are not wholly the same. Figures for the last fiscal year disclose the trade to be very lopsided in favor of Canada.

Imports from South Africa in the year totalled only \$36,114, while exports from Canada to that Dominion amounted to \$2,376,000. The principal items of imports were: fruits, \$17,000; hides, \$11,000; wool, \$23,000; and diamonds, \$20,000.

Canadian exports included motor cars, \$450,000; agricultural implements, \$617,000; pulp and paper, \$1,400,000; rubber goods, \$330,000; and wheat and flour, \$1,300,000.

Scotland Is Alarmed

Would Take Steps to Limit Number of Immigrants From Ireland

Glasgow, Scotland. — Steps to induce the British parliament to pass regulations limiting the number of Irish immigrants who have been invading Scotland have been taken here.

Nine thousand Irish persons came to Scotland in 1924, and in five years there have been 45,000 immigrants from the Free State. Advocates who are desirous that parliament intervene claim that the Scots are threatened with being crowded out of their own country.

Release Homing Pigeons

Montreal, Que. — More than 2,000 pigeons, representing an investment of more than \$10,000 were shipped recently to various points in Ontario where they were released to fly back to their home roosts. The homing pigeons of Montreal are rapidly gaining reputations as capable travellers. Very few of them ever lose their selves.

Is Representing Canada

Montreal. — The Right Hon. Charles Joseph Doherty, K.C., LL.D., former minister of justice in the Borden Government and one of Canada's leading legal authorities, sailed for England on Friday by the Canadian Pacific steamship Montcalm to represent the Dominion in the Labrador boundary dispute case before the privy council.

Needs Foreign Markets

U.S. Will Become Free Trade State Unless Tariffs Reduced

Liverpool. — The United States eventually must become a free trade nation, unless her tariffs are reduced so that the American and European producers can enjoy mutual exchange of goods, A. S. Paton, chairman of the Liverpool Cotton Association, declared Wednesday.

"It seems only natural," said Paton who was one of the signers of the international manifesto against tariff barriers, "that Lancashire, England, should be permitted to produce fine cotton goods out of cotton bought from southern growers, and exchange these goods with American consumers for their raw product."

"At present, American production in all lines points to the necessity of foreign markets for her supplies."

Needs Foreign Markets

U.S. Will Become Free Trade State Unless Tariffs Reduced

Liverpool. — The United States eventually must become a free trade nation, unless her tariffs are reduced so that the American and European producers can enjoy mutual exchange of goods, A. S. Paton, chairman of the Liverpool Cotton Association, declared Wednesday.

"It seems only natural," said Paton who was one of the signers of the international manifesto against tariff barriers, "that Lancashire, England, should be permitted to produce fine cotton goods out of cotton bought from southern growers, and exchange these goods with American consumers for their raw product."

"At present, American production in all lines points to the necessity of foreign markets for her supplies."

Did Not Attend

Unveiling Of Tablet

Irish Delegate to Empire Conference Explained Absence to Premier Baldwin. — W. T. Cosgrave, Irish delegate to the Empire Conference, did not attend the unveiling of a tablet to Empire war dead in Westminster Abbey. Sir instead Kevin O'Higgins, vice-president of the council of ministers in Dublin, and explained his own absence in a letter to Premier Baldwin. In it he said that O'Higgins lost a brother in the world war, whereas he himself was engaged in the Easter rebellion in Dublin in 1916, in which British as well as Irish were killed.

Cosgrave added that he feared his presence might bring pain to bereaved Englishmen, although he, personally, would have felt honored by attending.

Germans Form

Aluminum Trust

No Mention Made of Including Britain or United States

Paris. — Through the efforts of leaders of the German aluminum industry, a Continental trust has been formed, according to information reaching Paris business circles. A tentative agreement has been reached and France will probably be included before the cartel becomes operative.

The formation of this combination will be another coup for German business. Being a dominant factor in the aluminum trade any Germany, instead of carrying on the fight for world markets single-handed, will have the financial and productive power of the cartel behind her.

Naturally, other members — probably Switzerland, Holland and Belgium — will benefit, but Germany will be the most fortunate one in the agreement. No mention is made of Great Britain or the United States and it is presumed that these two nations do not figure in the projected trust, either directly or indirectly.

STATE OF RUSSIA NOW WORSE THAN UNDER THE CZAR

Montreal. — The political institutions in Russia are worse than under the Czar. There is not one breath of freedom, of thought, or action or of initiative in Russia today.

This is the opinion of the present Russian regime held by Mrs. Emma Goldman Colton, better known to the world by her first two names, who has arrived from Europe and is visiting friends in Montreal.

Mrs. Colton desired that it be made clear she did not come into Canada incognito, but that her passport naturally had been made out in her husband's name.

"I don't want Canadian people to think I sneaked into Canada," she said.

Mrs. Colton was deported from the United States in 1919, because of her revolutionary opinions and she went to Russia.

"That does not mean I favor a return to Czarism," Mrs. Colton added to her condemnation of present conditions. "But when a people rise in revolution, as the Russians have done, one has a right to expect a little more in the way of freedom and well-being than under the terrible regime of the Czar."

"Instead," she said, "I found a Russian dictatorship which added to the many evils of Czarism a great many evils of the Communist state."

The women of Russia, declared Mrs. Colton, had not gained the emancipation they had struggled for for 70 years.

There have been 1,167 lynchings in the United States since 1885.

MAY PAY CLAIMS ENTERED FOR WAR DAMAGES

London. — Though lacking legal status for their claims, Canada's civilians who suffered loss during the war are at last to be compensated.

At the next session the dominion parliament will be asked to consider legislation dealing with claims passed by the Puggley reparations commission for war damages. Some time ago a bill was introduced to provide compassionate grants, but it fell through. Today there is \$5,000,000 in the dominion treasury available for such payments. This is Canada's share of the reparations received to date under the Versailles treaty.

Now plan to use this in settlement of civilian claims. Thomas Mulvey, under secretary of state, will take up with British, French and German governments the complicated details of claims and will discuss with Berlin the problem of \$3,000,000 outstanding claims. He will also discuss at Paris the disposition of Canadian securities seized by France after seizure from Germany.

Canada holds \$12,000,000 German property, the disposition of which has not been considered by the Dominion. If Africa returned her seizure to Germany four years ago, the United States is now considering a similar step. Irrespective of further amounts recovered or the disposition of sequestered property, the distribution of the \$5,000,000 treasury will be settled next session with claims. It is expected small claimants being paid in full and others in proportion. This compensation must be compassionate and voted by parliament as such claims have no legal status.

The Royal Spasm

When United States Citizens Pay Homage to the Queen of Beauty

London. — "The royal spasm" in the United States is the subject of an editorial in the Daily Express. It points out there are more kings in America than there are in all the rest of the world put together, but they are indigenous kings.

"The real thing, the triple extract, three-ply, anointed crown heads of monarchy are not indigenous to the soil, so to speak," says the paper. "It is the future, it would seem to be an unlikely royal appearance, like Queen Marie of Rumania, the whole country makes its rosy cheeks and beauty homage to the queen of beauty. Judging from the cable descriptions of the future, it would seem to be a good thing that the United States is a republic. If they had a king and queen over them, they would soon be suffocated with the popular adulation."

Hoping For Straight Contest

No Three-Cornered Fight in Ontario Election Looked For.

Toronto. — Although discussion is rife with local politicians regarding the possibility of an agreement between Liberals and Progressives in the coming provincial general election, there is no indication as yet that such an agreement will be reached. The general impression seems to be that there will be no formal agreement but a tacit understanding.

Prominent members of both parties concerned asserted that it was both probable and desirable that Progressive voters should not oppose Liberals, or vice versa, in any riding, but denied that there had been any meeting of representatives of the two parties.

Farmers Receive Final Payments For Wheat

Cheques Mailed To Members Of Saskatchewan Pool Test \$1,094,056

Regina. — Farmers who signed Saskatchewan Wheat Pool contracts will receive \$1,094,056.63 in the final payment from the pool for their 1925 wheat, according to an official statement issued by pool officials. Cheques covering payments on the basis of five cents a bushel for No. 1 Northern, less deductions for carrying charges of one cent, are being mailed.

Other country elevators, operation and construction costs and commercial reductions have been sent out from the head office. The average price per bushel paid was \$1.45. From this the elevator and commercial reserve deductions and carrying charges were made.

Saskatchewan Hog Pool. — The Saskatchewan Hog Pool and the Saskatchewan Livestock Pool, which recently agreed to merge, have the new pool in operation by the beginning of the new year.

THURSDAY, OCT. 28, 1926

SATURDAY, OCT. 30th
IS RED CROSS DAY.

The Alberta Division of the Red Cross Society of Canada asks the citizens of Alberta to co-operate with them in the coming appeal for funds to carry on their contribution to a world wide organization for "The Improvement of Health, the Prevention of Disease, and the Mitigation of suffering throughout the world." Many people in the cities and also through the Province are still under the apprehension that the Red Cross Society is a War time necessity only and ask "What is the Red Cross doing?" In answer to this question we submit to you some of the services the Canadian Red Cross Society is striving to fulfil.

The Society introduces Junior Red Cross in the schools. Under Junior Red Cross organized in 1920 there are already 9,000,000 children throughout the world banded together to practice healthy living, to befriend other less fortunate children and so to gain actual experience in good citizenship. Over 20,000 children in Alberta are organized under Junior Red Cross in our schools.

The Canadian Red Cross also organizes classes in Home Nursing where women and girls are taught the elements of nursing and principals of home hygiene that the family may "keep well."

The Society operates Seaport Nurseries at the Atlantic Ports. In them immigrant mothers and children are welcomed to Canada and are given such attention as may be needed.

The Red Cross is equipped to render Disaster Relief when a community is overwhelmed by catastrophe.

As auxiliary to the Government as set forth in the Act of Incorporation, the Canadian Red Cross Society provides help and comfort to the disabled Ex-Service Man, and, if necessary, in case of sickness, relieves the needs of his family.

Red Cross Nursing Outposts are established in outlying districts to provide a nursing and hospital service to settlers who living in Pioneer communities would otherwise be without medical care.

The Red Cross publishes and distributes Health Literature so that people may come to realize the amount of unnecessary sickness which exists among them and may learn how it can be prevented.

All these services are necessary to the welfare of Canada. In order that they may be maintained, improved, and extended, your help and money are needed.

In becoming a member of the Red Cross Society you affiliate yourself with the Greatest Organization in the world with the highest ideals and aims in The Improvement of Health, Prevention of Disease, and the Mitigation of Suffering, Peace on Earth, Goodwill towards men.

SEPARATING THE WHEAT
FROM THE CHAFF.

The daily newspapers are carrying columns every issue just now, describing in minute detail every action, word and deed of Queen Marie of Rumania, who is making a tour of the United States and Canada, and about 90 per cent. of the flap-doodle printed ought to have found its rightful place in the

waste paper basket. However, it has been left to the Christian Science Monitor, of Boston, that estimable daily newspaper, to record one of the visitor's real worth while sayings in the following:

"I was christened a Protestant and have remained one, though my husband is a Catholic and my children Greek Orthodox—which is the religion of Rumania. We all, being civilized, respect each other's religion, and live in perfect harmony."

The straight and narrow path may be hard to travel, but at any rate it is never closed for repairs.—Los Angeles Times.

Goats for Sale

I have six goats for sale, will take \$7.00 each, or the lot for \$40.00. Three males and three females.

Immense Floods of Golden Grain From Western Prairies Now Pouring Through Lake Terminals

At the port terminals, particularly of Port Arthur and Port William, the Canadian wheat harvest is literally poured through the greatest grain-handling equipment in the world, like wonderful Niagara of pure gold, says the Ottawa Citizen. There are 25 such grain elevators looking out over Thunder Bay at the Canadian head of Lake Superior. They contain 61,700,000 bushels of grain. Most of Canada's 600 million bushel wheat crop is poured through this capacious spout. As much as 5,750,000 bushels has been shipped through in one day. For miles back into the country the long grain trails, debouching on the coast at Port William. More than 270,000 cars of grain from western points have been unloaded in one crop year. At one Port Arthur elevator, the cars are piled up by electrical tipping machines, which empty the grain into hoppers at the rate of one car every seven minutes.

Unloading the cars is the first step in the process of transferring the grain from the railroads to the lake freighters. The inside of a modern elevator is something more than a row of bins. It is as different from the ancient granary as the modern power-house is from the petreous old water-wheel. It is a triumph of mechanical engineering. As the millions of bushels of grain flow through, the wheat can be separated from oats and other cereals which sometimes get mixed up in the grain coming to the farm. Even the broken kernels can be extracted, leaving nothing but the whole grain to pass through. There is special machinery for handling damp wheat, and for drying it. No loss that can be seen is thrown away. The stray cars of wheat that have been mislaid by the shroter on the prairie are garnered in for thrashing at the terminal elevator.

The elevators at Port Arthur and Port William line the water front. They occupy over ten miles of harbor frontage, in actual no less than the loading of grain vessels. Some of the elevators are as long as ocean liners, with capacity to carry 50,000 bushels of grain each, which can be poured out at the rate of 100,000 bushels an hour. The sailing of a grain-laden steamer down Thunder Bay, with the white smoke from the funnels, the white and glittering in the towering waves, is an inspiring sight.

Orford Students On Farms
Returns to England After Harvesting Experience in Saskatchewan
Thirty students from Oxford University and Wye Agricultural College, returned home on the Canadian Pacific steamer, "Montclair" after having assisted in harvesting the Saskatchewan crop. These young men were brought out by the Department of Colonization and Development, Canadian Pacific Railway, and placed on selected Saskatchewan farms by the Women's British Empire League. They were without exception enthusiastic over the country and its possibilities. A few had remained permanently in Western Canada, and the optimism was expressed that within two years at least twelve more would be back in Canada for permanent establishment.

Leads Trade With Russia
United States Has Lost First Place To Britain
Great Britain has captured first place from the United States in the volume of trade with Russia. In 1925, despite the absence of diplomatic recognition, the United States led the world in Russian trade, but this year has fallen to third place. According to the statistics of the Trade Commission for the last 11 months, the order of trade was as follows: Great Britain, \$145,000,000; Germany, \$121,000,000; United States, \$64,000,000; France, \$27,000,000, and Italy \$26,000,000.

Cheap Power for Ontario Farmers
The Ontario Government is spending \$1,000,000 during the present fiscal year to make hydro-electric power available to the farmers of the province. This follows the plan begun by the Dairy Commission, of paying one half cost of primary line construction, and later extended by the Ferguson Commission to secondary line work as well.

It is now possible to buy air tickets in London for fifty-two different centres.

Never put off till tomorrow what you can do today—there may be a law against it by that time.

Early Settlements

Trading Posts Established in Northern Saskatchewan Before the Fall Of Quebec

Prof. A. S. Merton, University of Saskatchewan, who recently spoke at a meeting of the Prince Albert Historical Society, raised the question as to whether trading posts were established by the French traders in what is now the Prince Albert district long before the fall of Quebec in 1759. That there was a fort operated by French traders in the Carleton district, before the coming of the Hudson's Bay Company is fairly definite, and pioneer settlers remember the buildings at the mouth of the Shell River, "six miles west of Prince Albert."

Prof. Merton is endeavoring to fix the location of these and the historical society has decided to institute a search for the ruins of these forts besides securing all data concerning them that can be found and to this end investigators will visit these places in the near future.

U.S. Investments in Canada

Estimated Nearly Three Billion of American Money Invested in Canada
United States Investments in Canada and Newfoundland at the end of 1925 totaled \$2,255,000,000, or \$200,000,000 more than at the beginning of 1924. United States purchases of bonds alone in 1924 were \$1,156,673; in 1925 approximately \$12,000,000, and in the first half of 1926 \$76,000,000. Some idea of the rapid growth of United States investments in Canada can be gathered from the fact that in 1920 the total amounted to only \$150,000,000. By 1912 these investments had quadrupled, and since then have rapidly augmented.

Minister Invented Reaper

Model Made by Scotchman, Century Ago Was Not Patented
Those misguided persons—and there are many of them—who believe that the reaping machine, now used all over the world, was invented in America, will be disillusioned by the announcement that the invention was that of a Scottish minister. He was the Rev. Patrick Bell, who made the first model a hundred years ago. It was never patented, and was given to Dundee Museum, whence it was subsequently stolen. Centenary celebrations are to take place this year.

To Exhibit at Chicago Grain Show
Leading grain growers of Saskatchewan are preparing to exhibit samples of grain at the Chicago International and the Toronto local shows, according to M. P. Tait, Field Crop Commissioner. At least two previous championship winners are again in the grain year while many others have grain of such high quality as to feel confident of awards.

B.C. Cattle Ranchers Co-Operate
Cattle ranchers of the Interior of British Columbia are to form a co-operative selling organization this year, according to the Department of Agriculture. This new association will be ready to function next year, handling practically the entire output of the interior.

Increased Demand in the World for Mineral Products
A drastic cutting of business men at a luncheon called by Mayor Webb of Winnipeg, Dr. Charles Campbell, Deputy Minister of Mines, said, "In no country in the world is there a better outlet in the mining industry than in Canada, and we may expect the industry to expand and that rapidly." He based this opinion, he said, not only on the vast unprospected territories but also on the almost unbelievable increased demand in the world today for new mineral resources.

Nobody But Doctors
A doctor as bridegroom, a doctor as bride, both the children are doctors, with physicians' daughters as bridesmaids, a doctor's son as parson, and bride given away by a doctor, the best man a doctor, and a doctor at the organ were features of the wedding of Dr. Edward Eldridge Blomfield and Dr. Elizabeth Breckley, practitioners at Pontefract, England. The clergyman was not a physician.

Saskatchewan Egg Production
The recently organized egg and poultry pool in Saskatchewan has 17,000 members, according to the Canadian Government information bureau. Egg production in that province is \$2,675,262 a year, while as a poultry raising province Saskatchewan is now second only to Ontario.

Air Travel Becoming Easier
Between 1919 and March 31, 1926, air transport flying under British control covered a total of 4,565,000 miles, only four accidents, that caused thirteen deaths. This is equivalent to one accident in every forty-six trips around the world.

Quest of some species of ants fifteen years and longer, the workers living four or five years.

There are about 170,000 men and women in prisons of the United States.

World's Largest Co-Op.

Remarkable Growth of Wheat Pool Movement in Western Canada

Membership in the Canadian Wheat Pool totals, according to the latest available figures, is now 131,458 actual farmers in Manitoba, Saskatchewan and Alberta, controlling nearly 15,000,000 acres sown to wheat. The pool now owns 628 line elevators with an appropriate total capacity of 20,000,000 bushels. It also has six terminal elevators at Fort William and one at Buffalo, N.Y., with a combined capacity of about 20,000,000 bushels.

Though only organized three years ago the Canadian Wheat Pool is now the largest farmers' co-operative agency in the world. The pool sells its wheat through a Central Selling Agency, which has agents in 51 ports of the world.

Membership in the Canadian Wheat Pool is increasing continuously. About 75 per cent of the total acreage in Canada sown to wheat is controlled by the Pool.

Satisfied Settlers

British Families Who Located in Peace River Country Are Pleased With Conditions

The families that migrated to the Peace River country during the present year are all well pleased, satisfied with progress to date and enthusiastic of the future, according to J. A. McLeod, field supervisor of the Soldiers' Settlement Board at Winnipeg. It is also learned from the Assistant Manager of the Canada Colonization Company that 95 per cent of the Mennonite settlers who were placed in Manitoba, Saskatchewan and Alberta have "made good."

Scientific Agriculture

Thirteen Agricultural Colleges Now Established in Canada
Scientific agriculture is making headway, there being now thirteen agricultural colleges in Canada, as compared with two in pre-war days. President Reynolds of the Ontario Agricultural College of Guelph estimates the value of scientific instruction to graduates of his college in the past eighteen years at \$124,000,000. Selective breeding has done much to improve the strains of wheat, oats and barley—to mention one leading activity of the college.

Paper From Straw
Western Canada Pulp and Paper Company to Utilize Straw for Paper Manufacture

It is reported that a group of Edmonton business men have completed preliminary arrangements for the formation of a company to be known as the Western Canada Pulp and Paper Company, for the express purpose of manufacturing paper from straw by special process invented by Dr. Bache-Wile. A Dominion charter will be applied for and the company capitalized at \$500,000.

A correct guess passes for wisdom even though it is only a guess.

There are more than 1,000 woolen mills in the United States.

English Farmer Advocated Vaccination Long Before Dr. Jenner Tried It
Although vaccination is linked with the name of Jenner, there is ample evidence that it was practised by farmers and others in the rural districts of England long before his day. It was common knowledge amongst these people that an attack of cowpox immunised the sufferer against smallpox, and it was quite usual for farm workers to infect themselves and their children with the former complaint to protect them against the latter. Indeed, twenty-two years before Dr. Jenner made his first vaccination, a farmer named Benjamin Jesty, of Dorsetshire, openly advocated the practice, but not being a medical man, he was laughed at for his pains. Time has, however, proved his theory correct.

Maple Leaves for Britain
The maple leaf, Canada's emblem, is in demand in England. From the office of the Canadian high commissioner in London, requests for Canadian maple leaves to send over maple leaves which may be used for decorative purposes at public dinners during the year.

Some of the cypress used by Egyptians to make mummy cases is 3,000 years old and is still in a good state of preservation.

Berlin has more than two hundred bee-keepers who have more than three thousand hives on the flat roofs of buildings.

Face of the Earth Changing By Westward Drift of Continents Is Strange Theory of Geologists

Silk From Wood

Millions Invested in Artificial Silk Industry in Canada

Canada is looking forward in the rayon industry, or the making of artificial silk, and her future is bright with promise; bearing in mind her vast resources of timber that form the raw material of the fabric. A report issued by the Natural Resources Intelligence Service of the Department of the Interior shows much progress in recent years. As, for example, Courtlands Limited, the largest manufacturers of the product in the United Kingdom, have a \$2,500,000 plant in Cornwall. The Celanese Ltd., a \$7,000,000 concern, is constructing a large plant at Drummondville, Que. The Howard Smith Paper Mills have formed a subsidiary company called the Canadian Cellulose Co. to be operated in Cornwall, Ont., and the B. C. Pulp and Paper Company is carrying on chemical research into the use of hemlock, with good results to date. Other concerns are reported to be making preliminary moves towards establishing plants.

An Important Industry

Women in Vancouver Are Making Money Seed-Growing
Interesting variations of flower gardening for profit are shown by Women's Institute members.

For instance the seed-growing industry in the province is very important and many women are engaged in it. Lavender is grown quite extensively in the Okanagan valley and is equal to that grown in Somerset, England. Two women close to Victoria, who have half an acre, have started the manufacture of lavender water. One member in the Kootenay district has been forced to grow flowers for immortality and this year will have a very large quantity of seed for sale. Another member has one of the largest collections of rare varieties and is growing some trees around the house. On Vancouver Island women in many parts have been growing seed for years and selling their crop to larger growers who market the seeds in England.

Southerner Impressed With West
Surprised to Find That Vegetables and Fruit Trees Do So Well Here

In giving his impressions of western Canada, H. W. H. Horticultural Editor of "The Progressive Farmer," Memphis, Tennessee, expressed surprise to find large quantities of vegetable grown, fruit trees in many parts, and trees around the farm homes and flowers in brilliant luxuriance. "To my surprise," he said, "I found apples growing in nearly every section of western Canada—not on a commercial scale, except in British Columbia, but grown nearly everywhere for home and local markets. Hardy varieties found there included the Siberian Crab, the Dubouché, Lowland Raspberry, Bluedale, Caville, some hybrid 'Crab's' were 'Jewel,' Sylvia, Prince Norman, Transcendent, Florence, Virginia and Hyslop. British Columbia grew the regular American varieties.

Time Proved Theory Correct

English Farmer Advocated Vaccination Long Before Dr. Jenner Tried It

Although vaccination is linked with the name of Jenner, there is ample evidence that it was practised by farmers and others in the rural districts of England long before his day. It was common knowledge amongst these people that an attack of cowpox immunised the sufferer against smallpox, and it was quite usual for farm workers to infect themselves and their children with the former complaint to protect them against the latter. Indeed, twenty-two years before Dr. Jenner made his first vaccination, a farmer named Benjamin Jesty, of Dorsetshire, openly advocated the practice, but not being a medical man, he was laughed at for his pains. Time has, however, proved his theory correct.

Maple Leaves for Britain
The maple leaf, Canada's emblem, is in demand in England. From the office of the Canadian high commissioner in London, requests for Canadian maple leaves to send over maple leaves which may be used for decorative purposes at public dinners during the year.

Some of the cypress used by Egyptians to make mummy cases is 3,000 years old and is still in a good state of preservation.

Berlin has more than two hundred bee-keepers who have more than three thousand hives on the flat roofs of buildings.

One of the most bizarre, yet significant, theories ever advanced by scientists, is now being tested by a network of radio stations covering most of the earth's surface.

The hypothesis offered by Professor Alfred Wegener of the University of Graz, Austria, and Dr. William Schuchert, German geologist, are that all land masses of the earth once formed a single continent before splitting up into the continents we know; that they are still reforming and perceptibly drifting westward and equatorward; that Europe is shrinking, France and Germany sinking, and Norway and Sweden are rising higher from the sea.

Observations taken at the radio stations of the world, says the November Popular Science Monthly, will either prove or disprove this strange theory. Whether Greenland is drifting westward at the rate of 100 feet a year, and other masses at a slower rate, as is now tentatively held, may be established definitely in time.

Professor Wegener points out as evidence in support of his theory that the outlines of the world's great continents fit as nearly into the supposed supercontinent as a jigsaw puzzle. The west coast of Africa, for example, fits almost perfectly the eastern coast of North and South America.

Professor Wegener says that the attraction of the sun and moon on the earth's surface broke up the supercontinent and caused the western drift. How the solid earth can drift is explained by the fact that the surface rock, called rind, is softer than the silica rock near the earth's core, on which it floats.

London's Newspaper Home
Publications of Many Years Are Stored At Hendon

Hendon, just outside of London, is the home of the world's greatest storehouse of old newspapers and "pulp books"—those ancient lists of voters which Irish American tourists turn over so feverishly to quest of their English origin.

Hendon houses, indeed, more newspapers than can be found anywhere else in the British Isles. Newspapers have been poured into Hendon by the ton for more than twenty years. They are stored in neat fireproof rooms. Now and again they are taken down and sent away to be devoured by some assiduous reader, but the great bulk of them will never be read again. They are bulged along after merely because somebody may walk into the British Museum one morning and ask the clerk for a copy of the "Pudsey-on-the-Puddle Gazette" of the second week in January in the year 1752.

London's great hoard of the newspapers of the past is in Collindale road, where repose millions of newspapers—news sheets from every remote village and hamlet in the kingdom.

All the newspapers that go to Hendon spend a few months probation in the archives of the British Museum itself. They are then sent to the binders, where they are neatly and securely bound. They are returned to the museum and later sent out to Hendon. Once every week the museum's motor van journeys out to Hendon and returns loaded with old newspapers from "The Repository"—these are the periodicals which museum readers have asked for. The volumes when finished with are returned to Hendon.

London newspapers, curiously enough, never leave London. They are all kept in the Museum itself.

New Idea For Mail Boxes
Mail boxes on wheels are proving a success at Amsterdam, where collection boxes are attached to the backs of trains going toward the central post office. At the halt in front of the post office the boxes are emptied and letters are rushed to the sorting rooms saving several hours time in collection.

Carload of Wheat
A carload of trout weighing 22,000 pounds arrived at Edmonton recently from Great Slave Lake and was sent by train going toward the central post office. At the halt in front of the post office the boxes are emptied and letters are rushed to the sorting rooms saving several hours time in collection.

The railway engineer may not be a leader of society, but wealth and fashion frequently follow in his train.

Illured mourners in Mesopotamia pull out their hair to demonstrate the gentleness of their grief.

Greenland, with an area of 372,000 square miles, is the largest island in the world.

Sell Bread Of Oven Freshness

Your customers want fresh bread because it tastes better. Appleford wrappers will seal your bread from the air and keep it fresh a day longer. More sales for week-end and holidays—no drying out and loss of weight—few store returns.

Appleford wraps are so strong they won't tear or crack under the corners. We will make a distinctive design for you.

WORLD HAPPENINGS BRIEFLY TOLD

More than 1,000 employees at the Dowling Steel Works, Cardiff, Wales, who have been idle since the general strike last May, have returned to work.

Pire destroyed a \$20,000 clam plant of the Strawberry Point Packing Company at Cordova, Alaska. Bosta used by the plant and stored for the winter were burned.

Gilbert Robinson, secretary of the Ontario Motor League, stated that Ontario motorists will save \$170,000 through the proposed reduction in the cost of Ontario automobile licenses and the new system of taxation.

Reprisals for resorting to poison gas warfare by employing gas against a country violating the anti-gas agreement were opposed in the preliminary disarmament conference by Great Britain, Italy, Japan, and the United States.

Gold held against notes in circulation by the Minister of Finance September 20 last, amounted to \$113,237, 282. This is approximately 100 per cent of the total circulation on that date which amounted to \$287,123, 317.

The five day week with six days pay has reached the Pacific Coast. David Crowley, general manager of the Crowley Shipbuilding Company, Oakland, Cal., today announced he is preparing to put the new plan into effect in the shipyards in Oakland, where the company employs approximately 200 men.

Lieutenant-Commander Richard E. Byrd, of North Pole fame, intimates that he might attempt a flight to the South Pole. "I am afraid I am going to try for the South Pole, too," said Commander Byrd. "I'm not saying much about it, though. It's all in the future; nothing definite as yet."

Aged Missionary Is Attempting Big Job

Will Revise Translation of Old Testament into Amoy Dialect
Seventy-seven years old, and for 22 years a missionary on the island of Formosa, Rev. Thomas Barclay, of London, is returning there after a six months' holiday, to spend three years revising the existing translation of the Old Testament into the Amoy dialect. He can complete the job in three years only if he finds it possible to work six hours a day for six days each week. Otherwise it will take him longer.

Alberta As a Game Province
Alberta has the most wonderful wild game hinterland in North America, according to Adolf Muller of Northtown, Pa., Game Commissioner for that state. He expressed that opinion after spending a month in the interior of the province, exploring and taking motion pictures, including some of cartoon on the track.

TEETHING BABIES DIE EVERY SUMMER

The hot weather is very hard on babies starting to eat their teeth. On the first sign of any looseness of the bowels the mother should give a few doses of

D'FOWLER'S

Edison Changes His Attitude

Says He Now Believes in Life After Death

Thomas A. Edison, after varying degrees of skepticism on the question of immortality of the soul, has made known his belief that the evidence is in favor of life after death.

In an interview, published in the November Forum, the inventor admits he sees nothing incredible in the possibility of the soul's being immortal. He urges religious teachers to study the subject and try to build up proof which skeptics cannot laugh at.

His latest attitude is at variance with previous stances.

Six years ago he said he was "dabbling" with apparatus with which he hoped to communicate with spirits, and then he later said "It was all a hoax."

In 1924 he said, "My brain is incapable of conceiving of such a thing as a soul."

In his earlier years he and Luther Burbank were leaders in the Free-thinkers' Society.

First Twopenny Post Lacking in Dignity

Not Considered Good Form to Use It For Private Letters

Protests at the humiliation of having trade advertisements stamped by the Post Office on our correspondence may recall the days when postal communication of any kind was considered a little lacking in dignity. Miss Louise Courtney in her reminiscences says that "when the London twopenny post was first established it was not elegant to make use of it for private letters. I remember my father's annoyance when a stupid footman posted a letter to Sir Robert Peel instead of sending it by a groom. It seems so impertinent," he said, "to send a letter to a man like Sir Robert Peel by post." Invitations and other business were always sent by hand.—Manchester Guardian.

Mountain Peak Easily Reached

People of Vienna Use Suspension Railway to Avoid Long Climb
The fortunate people of Vienna are now able to enjoy the delights of sports on a peak 5,000 feet above sea level within little more than two hours of leaving their front doors.

Austria is, of course, one of the lands of the Alps, and at holiday times the call of the mountains is strong among the city folk. The Rax Alpine, a journey of 110 minutes from Vienna by train, has 140 paths to its summit worn by the feet of countless travelers.

The trouble is that the climb takes three hours in the ordinary way, but to get over this difficulty a suspension railway has been built up the mountain by which people will be able to ascend 3,200 feet in ten minutes.

Queen Marie Lavish With Tips
Everybody who works on the Levita thus hopes Queen Marie of Rumania will come again. Her largest tip was about \$1,500. The lowest tip was \$5. Several received good \$50. One steward was given a gold watch; stewardesses received diamond brooches. The Queen gave \$200 for the ship's sick fund and \$500 for cokes for the whole crew.

Makes Good Showing
If the Scriptures distributed by the Pagan agency of the American Bible Society during 1925 could be piled up, copy by copy, they would run up in space about 11,216 feet, or 1,849 feet higher than the mountain Fuji. If laid out end to end they would extend 30 miles.

Search me.
"What is the difference between ammonia and pneumonia?"
Search me.

A cow belonging to Rutgers University carries 21,136 pounds of milk in 305 days, or fourteen times her own weight.

The Planet Mars

Scientists Will Endeavor to Discover If Planet is Inhabited

Observations now are under way at the Greenwich Observatory which may definitely prove or explode the theory of human habitation on Mars. Not since 1828 has the planet been in a position so favorable for scientific study.

Although Mars is 8,000,000 miles farther from the earth than it was two years ago, the fact that it will be visible 32 degrees higher in the sky, where the atmospheric handicap is thinner and consequently clearer, will make the observations far more accurate than at any time since the advent of modern astronomical methods.

For the next few months the scientists will concentrate their attention on the so-called Martian "canals," about which the dispute over human habitation is centered. One school of scientific thought contends that these geometric lines on Mars plainly could be canals built to obtain water from the melting polar caps to irrigate an arid planet. Those who discard this theory declare that the "canals" are merely an optical illusion.

A Model Town

Fort Alexander, Man., Laid Out on Modern Lines

A model town is springing up in Manitoba at Fort Alexander, where work on the new mill of the Manitoba Pulp and Paper Company is being rushed to completion. It is expected that the mill will commence production in November.

A town is being built to house the mill employees and accommodation is being provided for 1,000 persons. Light and sewage systems have been installed and the town laid out on the most modern lines. In addition to homes, the company has built office buildings, stores and a motion picture theatre.

"Ideal Fashions"
by **Jane Holt**

Constable Hawkins states that he has performed this small favor for him perhaps a dozen times—and the wonder of it is that never once has he misjudged his man.

Has a Curious History
Very Few People Know How Word "News" Originated
The word "news" which is so important in our present-day existence, has a curious history, before the advent of newspapers of general interest were posted in public places under four columns, headed: N. E. W. S. In the column headed "N" lapsing from the North were recorded in column "S" from the South; in the "W" column were recounted occurrences in the West, and under "S" came Southern notes. Gradually these four letters were joined to form the word "News" as we now know it, embodying in itself reports from all points of the compass.

The Dolman Sleeve an Important Development in Coats

Vionnet gives this coat distinction with her new, loose sleeve, and the woman who saunters with the fashion will admire its style and adaptability. The coat presents a straight-line silhouette, with fur-trimmed convertible collar, and long rolling revers that end in a wrap-over closing. The small back view and diagram picture the simple design of No. 1423 which is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 3 1/2 yards 64-inch material; lining 4 1/2 yards 36-inch 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

The King of England each year receives a herring bone from Yarmouth in payment of that community's feudal obligations.

The Generosity of a "Cop"

Police forces are much in the acid glare of public criticism; rather quick they become noted for their failings or their virtues. In the lives of the man whose luck is out they have become something of a *Nepos*. They fall sometimes to discern the human qualities of the policeman beneath the stern mask of the disciplinarian; qualities that have made the London "Bobbies" noted for their piety; the New York "Coppers" for their quick road humor, or the Paris *Semardes* for their tact.

Incongruously, there has been much on one "down and out" who will swear by Constable Hawkins, who may be observed almost any day standing at the entrance of the Canadian Pacific Windsor Street Station in Montreal. He is a member of a smaller constabulary in Montreal—the Canadian Pacific Police—whose services rendered far exceed their daily duties. From the great life of humanity of cosmopolitanism, there is one fixture at least in Station, not a small part is of immigrant calibre. They seek the cheek and uncensored good out to see the town. Sometimes they have little money and what they have is soon gone. A twenty-day hunt for work ends in failure, and they think of their baggage in hook, as it were, and the debt in their pocket to some western farm. There is one fixture at least in this place where men come and go—Constable Hawkins—to whom many have turned in desperation the "down and out" advances. Would he lend him two dollars to get his grip? Yes, he will—and does. Wonders of wonders. And the man boards the next train for the west.

Constable Hawkins states that he has performed this small favor for him perhaps a dozen times—and the wonder of it is that never once has he misjudged his man.

Performed During Feast
Men Climbed Highest Mountain in Scotland on Motorcycle
Up Ben-Nevis, Scotland's highest mountain which has an altitude of 4,946 feet, on a motorcycle, was the daring feat recently accomplished by two men in order to prove the authenticity of the ascent the cyclist obtained written credentials from climbers on route. The machine proved itself a good hill-climber, and the winner took the mountain top in 3 hours 40 minutes. Some idea of the accomplishment may be had when it is mentioned that the bribe path to the top is a bad state of repair, and great difficulties were encountered when the washed-down gravel beds, which are involved with boulders, had to be crossed. When the base was reached it was found that the rear brake had been practically worn through.

Heavy Postage on Parcel
Carried by U.S. Air Mail Had \$150 in Stamps

What is believed to be a new record for high postage paid on a single parcel was established at Philadelphia when a package was sent from there to San Francisco by air mail carrying \$150 in stamps.

Postal regulations prohibited clerks in dividing any description of the package, its contents, or recipient, but the parcel was newly covered with 35 stamps. The air mail postage across the continent is \$1 a pound.

The package went to New York and thence by plane westward.

Canadian Securities Are Sound
"More and more the United States investor is demanding that Canadian securities have a place in his portfolio," according to Lewis L. Strauss, chairman of the Board of the Canadian Security Corporation, New York. "The fact that Canada can borrow money in the United States at a very low rate of interest," he said, "is proof positive how much her securities are in demand today."

A Cleveland, Ohio, man claims to have discovered an upright piano that is 125 years old. He probably dates its longevity to its upright character.

Don't believe that a woman believes all that a man believes she believes.

Canada's Vital Investment

By C. W. Peterson

Accepting Prof. Irving Fisher's estimate of average value to the state of \$2,000 for each productive citizen, we may logically conclude that it would apparently be sound business to expend up to this amount upon the maintenance, education and training of the native child until it reaches the productive age, or, in order to compensate for a falling birth rate, or to speed up settlement, upon propaganda and other effort to transplant in Canada an acceptable person of productive age from another country. Records show that since 1870 we have brought somewhat over 4 1/2 million people to Canada at a direct cost to the government of 27 million dollars. Estimating the expenditure of the railways, provinces and other active agencies at an additional 45 million dollars, the aggregate cost would be \$72 million dollars, or an average cost per head of less than \$20. Has Canada ever spent money more advantageously? Is it conceivable that any national investment could possibly yield greater returns?

It is instructive to contemplate the uniformly attitude of European nations towards the emigration of their citizens except to a direct cost to the government of 27 million dollars. Estimating the expenditure of the railways, provinces and other active agencies at an additional 45 million dollars, the aggregate cost would be \$72 million dollars, or an average cost per head of less than \$20. Has Canada ever spent money more advantageously? Is it conceivable that any national investment could possibly yield greater returns?

There is, on the contrary, a keen appreciation of the potential value to the state of the vital asset, and nations will go to almost any lengths and incur the most fantastic expenditures on relief, to preserve this precious asset intact during periods of economic stress, in the hope of the unemployed population being ultimately absorbed in useful production.

The educational problem in Canada is not in any sense a class problem. Every citizen, irrespective of occupation, has a direct financial interest in the effective solution. If every citizen of the community would intelligently study the effect of an increased productive population upon its own fortunes, we would speedily create a favorable mass opinion on this subject.

Explanation and Comments
20. A Picture of a Drunkard, verses 28, 30. If a series of questions the writer of these verses gives us a vivid picture of a drunkard. "Who hath Oh! Who hath Alas!" the Hebrew literally reads, for the words translated we sorrow are interrogations, not nouns. "Who hath Alas!" the Hebrew literally reads, for the words translated we sorrow are interrogations, not nouns. "Who hath Alas!" the Hebrew literally reads, for the words translated we sorrow are interrogations, not nouns.

Golden Text: At the last, it bleth like a serpent, and stingeth like an adder. Proverbs 23:32.

Lesson: Proverbs, 23:25-35.

Devotional Reading: Psalm 97:16, 10:12.

Whether or not the world would be vastly benefited by total and final abolition of all intoxicating drinks seems to me not an open question. Three-fourths of the drunkards are affirmative with their tongues, and I believe all the rest acknowledge it in their hearts." (Abraham Lincoln).

Growth Of Manufacturing
Industries Shown to be Making Rapid Progress in Western Canada
The manufacturing industries continue to make progress in western Canada, according to a recent report of the Dominion Bureau of Statistics. Between 1922 and 1924, \$17,684,925 was added to the capital invested in Manitoba industries; \$27,717,121 in Saskatchewan; \$5,906,674 in Alberta and \$34,421,907 in British Columbia. The net value of production in Manitoba in 1924 was \$42,215,250; in Saskatchewan, \$61,131,784; in Alberta, \$26,142,886 and in British Columbia, \$85,361,952.

Contract Doctors in Germany
There are more doctors in Germany than there are patients to support them, and hundreds of thousands are on the "unemployment" lists. That is because of the growth of state and city clinics, to which any German can belong. Four out of five people do belong to them, and get the normal attendance from contract doctors for a very small fee.—Youth's Companion.

A Business Governor

Lord Willington Will Keep Office Work Separate From Home Life

Lord Willington, the new governor-general of Canada, has announced that he will be at his office at the Parliament Buildings at Ottawa daily at eleven o'clock to transact official business.

The significance of this announcement lies in its novelty so far as the Ottawa precedent is concerned. Heretofore the governors used their up-town offices but little. They have been in the habit of having official documents sent to Rideau Hall, the official residence. That practice entailed some loss of time and embarrassment when speed was a factor.

Lord Willington's departure from accepted practice suggests that he proposes to inject business methods into an office which many people regard as more ornamental than practical. There is nevertheless, quite a lot to be devolving upon the governor-general in connection with affairs of state. His signature to documents is essential. According to the new representative of the King, those who have business to transact with him will know where to find him, and will not believe in involving his home life in the details of his office. That is the way most efficient executives do things. It is a good sign.
